

# Validation Rules

Validation rules verify that the data a user enters in a record meets the standards you specify before the user can save the record. As a crm product owner they requested to create a validation rule on account object on the phone field. 5.Then create a new role HR Manager.

## Creation Of Validation Rule

1.Navigate to object manager and select Account object.

2.In details section scroll down and find validation rule in it.

3.Click new, give the label name and in edit error conditional formula give the formula- LEFT(Phone, 1) <> "+" .

4.In error message give the description has Phone number must begin with + (country code).

5.In error location select field.
